

# Yes

I **CAN** help you with your slow computer, wireless network, home theater, viruses, spyware, backup solutions, and just about anything that can make your digital lifestyle a little easier.

Remote or in-home service available.

Put me in your phone contacts under Teknowledge, or Dan the Computer Man like some of my more *seasoned* clients. Before throwing your PC through the window, try giving me a call. Hand me this ad and I'll knock \$20.00 off your bill.

Dan: 613-325-9121
